PART 2

Messages

Dr. Mojtaba Mohammadzadeh Lame

**Assistant Professor, Subspecialty
in Intensive Care Medicine**

In today's modern world, the aim of all reputable hospitals in the world is to provide the most up-to-date educational, research and high quality treatment services. I am the head of the Imam Reza General Hospital in collaboration with our colleagues in the deputy of research and education, treatment and the financial support are determined to further expand the process of internationalization of this Hospital. In this regard, preliminary collaborations with the World Health Organization (WHO) are being completed and institutionalized. Furthermore, the necessary coordinations are being developed to establish scientific and educational cooperation with several reputable hospitals in Turkey that will be done in the near future. It is worth mentioning that the English website of the hospital has improved its contents in line with the internationalization of activities of the center. It should be noted that the establishment of new institutional units in the hospital, including the Covid studio and its new English programs that will be produced by the professors of the center, the establishment of the clinical skill units in the center, the establishment of the innovation office, and the publication of the seventh issue of the Imam Reza General Hospital bilingual Newsletter indicate the important fact that Imam Reza General Hospital is transitioning from a national state to an international institution.

Dr. Hassan Soleimanpour

**Professor, Subspecialty in Intensive
Care Medicine (ICM), Clinical
Fellowship in EBM, Fellowship in
Trauma Critical Care and CPR**

"Science" is believed to have no limitations. It belongs everywhere it comes from and goes to, and it is generally respected. Scientists see scientific issues and discoveries as appealing to the public. Developed countries are interested in attracting the world's best talents to create talent pools and benefit from their spiritual, scientific, and knowledge skills to accelerate the development processes of their country. Therefore, one of the indicators of the performance of universities is their internationalization activities. Generally, universities in Iran are evaluated based on the validity of their research activities, their output in international journals, and the number of articles indexed in related databases. We may assess universities and provide credits using international students' and postdoctoral researchers' per capita admission. Reputable academic centers use these indicators to rank universities. In this respect, scientific and knowledge achievements are of significant value for admissions institutions. We anticipate that Tabriz University of Medical Sciences' support of Imam Reza General Hospital's international efforts will attract top talents.

Courses Contents

Department of Emergency Medicine

**Title**
Advanced Trauma Life Support (ATLS Series)
(Dr. Nasim Hajipoor)

Basic Information	
Program-Type	Educational
Level of Course	Advanced
Faculty	Medicine
Department	Emergency Medicine
Name of Program	Advanced Trauma Life Support (ATLS Series)
Attendance	Online- In Person
Price	It is accessible via our website (http://imamreza-en.tbzmed.ac.ir/?PageID=234)

Contact Information	
Telephone	+989305781323
Email	Nasimhajipoor595@gmail.com
Department Address	Tabriz University of Medical Sciences
Name of the Lecturers	Dr. Nasim Hajipoor , Dr. Gholamreza Farid Alaei

Program Details	
Date	Based on Appointment
Duration (Start and end)	4 Weeks
Language (s)	Turkish, English and Persian
Eligible Individuals for Participation	mergency medicine residents / General Physicians Emergency medicine specialists

Title

ABG and VBG interpretation

(Dr. Nasim Hajipoor)

Basic Information	
Program-Type	Educational
Level of Course	Advanced
Faculty	Medicine
Department	Emergency Medicine
Name of Program	ABG and VBG interpretation
Attendance	Online In Person
Price	It is accessible via our website (http://imamreza-en.tbzmed.ac.ir/?PageID=234)

Contact Information	
Telephone	+989305781323
Email	Nasimhajipoor595@gmail.com
Department Address	Tabriz University of Medical Sciences
Name of the Lecturers	Dr. Nasim Hajipoor , Dr. Gholamreza Farid Alaei

Program Details	
Date	Based on Appointment
Duration (Start and end)	4 Weeks
Language (s)	Turkish, English and Persian
Eligible Individuals for Participation	mergency medicine residents / General Physicians Emergency medicine specialists

**Title****Point of Care Ultrasound in Emergency****(Dr. Moloud Balafar)**

Basic Information	
Program-Type	Educational
Level of Course	Advanced
Faculty	Medicine
Department	Emergency Medicine
Name of Program	Point of Care Ultrasound in Emergency
Attendance	In Person
Price	It is accessible via our website (https://imamreza-en.tbzmed.ac.ir/?PageID=234)

Covid Studio

Since September 2020, the beginning of the Covid Pandemic, Covid Studio in Imam Reza General Hospital has been established. (It is worth mentioning that this studio has been established for the first time at the educational level among hospitals in the country in order to provide virtual education services in this hospital).

COVID-19 crisis is a global pandemic that has affected all aspects of human life in all societies, such as social relations, cultural activities, economic situations and medical education. Therefore, virtualized training was inescapable in these conditions. For this reason, according to Imam Reza General Hospital's head's order and deputy of education and research has established (Sep 2020) Studio COVID-19 and scientific COVID committee. At the moment, the studio COVID-19 schedules in different medical aspects are available on social media such as YouTube <https://www.youtube.com/channel/UCIQJc2puPFSLMHm3GIH5A-A> It is worth mentioning that we have produced over 200 virtual international educational programs in the Covid Studio.

Clinical Research Development Unit

- Activities of this unit have been initiated since January 2019 under the leadership of Prof. Hadi Hamishekar, professor of clinical pharmacology.
- In order to make research purposeful in hospitals dependent on medical universities and help to meet the country's research needs in the area of medicine and life sciences, the clinical research development unit was established. All the affairs of this unit are managed according to these requirements.
- The goal of this unit is to provide a suitable platform for research in a wide range of educational and medical services to the community and publish them to inform the related organizations from the acquired results of this research.
- It is worth mentioning that the Clinical Research Development Unit of Imam Reza General Hospital, Tabriz, Iran has ranked fourth nationally and first within the Tabriz University of Medical Sciences for two consecutive years (2022 and 2023).

Newsletter

Imam Reza General Hospital has been publishing 15 issues of the bilingual newsletter every 3 months in the center. In this bilingual newsletter, there are different types of scientific subjects which were written by the professors of the center. Professors' scientific indicators and abilities of the professors in the area of innovation have been published in each issue during the past three years.

Obtaining the Full Approval of the Educational Accreditation of Imam Reza General Hospital, Tabriz, Iran

The educational accreditation system of hospitals is one of the most important models for monitoring the activities of education hospitals and evaluating their performance. In brief, it can be said that accreditation is the granting of a permission or conferring of the qualification of an educational unit which has considered the predetermined criteria based on the judgment of experts in the related area. Therefore, it is of a great essence to be aware of and take the methods that can be a beneficial base for improving the quality of country's medical education. It is my pleasure to declare that with the efforts of professors, residents and medical students of Imam Reza General Hospital, Tabriz, Iran, and with the admirable management of the deputy of education and research and the efforts of hardworking staff, we were able to fully approve the educational accreditation of the Ministry of Health and Medical Education for the first time in 2022. It is worth mentioning that the internationalization of the Imam Reza General Hospital, establishment of new units in the deputy of education and research, including innovation office, center for skill lab, Covid study and clinical research development unit in the center played a significant role in obtaining this approval. In this regard, other important items in obtaining this approval can be related to the development of new treatments in the center, including the quantitative and qualitative expansion of organ transplantation, establishment of several new treatment departments such as interventional radiology, hyperthermia induction, pulmonary hypertension clinic, establishment of an active therapy center and palliative care medicine and pain department. I would like to congratulate this valuable success to the respected chairperson of the Tabriz University of Medical Sciences (TUOMS), respected professors and dear students of the center, and also express my special gratitude to the efforts of the respected deputy of education of the TUOMS, to the respected deputy of education and research of the Imam Reza General Hospital, and to the respected managers of the educational departments of the center as well. I would like to appreciate the precious efforts of the respected deputy for management development and resources of the center and the support of the respected deputy of treatment and their unique efforts that have played a great role in achieving this honor in this great path.

* Mojtaba Mohammadian
Associate Professor of Anesthesiology and Intensive Care Medicine
Dean of Imam Reza General Hospital, Tabriz, Iran

Scientific Collaboration of Imam Reza General Hospital, Tabriz, Iran with World Health Organization and Cerrahpasa Hospital, Istanbul, Turkey

It is my pleasure to announce that in order to improve the educational and research performance of the Imam Reza General Hospital, Tabriz, Iran, the final steps of joining this hospital as a collaborating center with the World Health Organization are in progress, and also the Cerrahpasa Hospital has declared their willingness to have scientific collaboration with the clinical departments and research centers of Imam Reza General Hospital. At the moment, we can announce that Imam Reza General Hospital, Tabriz, Iran has entered a new part of its scientific activities and is moving forward to join great international and academic institutions with its deep devotion for education and research of this center. I would like to declare my appreciation for all the support of the respected chairperson of the Tabriz University of Medical Sciences (TUOMS), to the respected principal of interrelated communications of the TUOMS, to the respected educational and research assistants of the TUOMS, and to the praiseworthy efforts of the respected dean of Imam Reza General Hospital, Tabriz in this great path. Through the grace of God, we will soon have the presence of the respected representative of the World Health Organization in Iran, Dr. Syed Jaffer Hussain, at Imam Reza General Hospital, Tabriz, Iran. In this respect, we will put strenuous efforts on accelerating the process of joining Imam Reza General Hospital with the World Health Organization as a collaborating center. As well, in the near future, we will witness the presence of Professor Nuri Aydin, the chairperson of the Istanbul University Cerrahpasa and dean of Cerrahpasa Hospital, at Imam Reza General Hospital, Tabriz, Iran. To put into practice the process of exchange of professors, and students and also have research collaborations, indeed, our greatest wishes in this path is the presence of knowledgeable professors, talented residents, dear nurses and students, and hardworking hospital staff.

Dr. Syed Jaffer Hussain

Healing towards Imam Reza General Hospital Joining as a WHO Collaborating Center

Imam Reza General Hospital, Tabriz, Iran with World Health Organization

The Innovation Office at Imam Reza General Hospital, Tabriz, Iran

The importance of innovation has increased dramatically so some institutions and universities are currently ranked based on the factors and criteria affecting innovation and entrepreneurship. Universities which put innovation as their priority have progressed with extensive activities in the development, commercialization and protection of these innovations. The innovation office of the center as the only innovation office in the university officially started its activities in 2019.

The Artificial Intelligence Laboratory at Imam Reza General Hospital, Tabriz, Iran

We thank God that with the comprehensive support of the esteemed Vice chancellor for research of the university and the special attention of the respected Dean of Imam Reza General Hospital in Tabriz, the Artificial Intelligence Laboratory at Imam Reza General Hospital in Tabriz has been established and is on the verge of becoming operational. Some applications of artificial intelligence are to enhance healthcare quality, assist in diagnosing and treating diseases, and bring transformation in this field. Traditional medicine has undergone substantial changes with advanced artificial intelligence technology. Furthermore, artificial intelligence technology has significantly contributed to developing pharmaceuticals, Health Information Technology, and education in the field of medicine. Artificial intelligence enables computers to think, reason, and solve problems like humans.
